

EDFA-MP-MSA

DEVICE

MSA EDFA Module, +20 dBm, C-band

OVERVIEW

The Optilab EDFA-MP-MSA is a high-gain optical amplifier module in a multiple source agreement footprint housing. It is an easy-to-use and cost-efficient solution for photonic subsystems, OEM integration, and fiber optic system integration. Using a high gain design, this pre-amp module provides over 30 dB gain and up to +20 dBm saturation output power. Software control via an standard TTL RS-232 interface is available for status monitoring and pump current adjustments. It also features pump laser protection and alarms to ensure the reliability and safety of the device. The EDFA-MP-MSA only requires a single +5 Volt DC power supply for operation. Contact Optilab for more information.
